# DBMS Question Bank - Semester 4

College Buddy - free study resource sample file

## Section A: ER Model

Q1. Draw an ER diagram for a college library system. Mark keys and cardinality.

Q2. Explain weak entity sets with an example.

## Section B: Normalization

Q3. Explain 1NF, 2NF, 3NF and BCNF with one example each.

Q4. Decompose a relation into BCNF and check for lossless join.

## Section C: SQL and Transactions

Q5. Write SQL queries using JOIN, GROUP BY and HAVING.

Q6. Explain ACID properties with an example of bank transfer.

Q7. What is a deadlock in transactions? How is it handled?
