Engineering Mathematics I - Notes

College Buddy - free study resource sample file

Unit 1: Matrices

Rank of a matrix, row echelon form, consistency of linear equations.

Eigenvalues and eigenvectors with Cayley-Hamilton theorem.

Unit 2: Differential Calculus

Successive differentiation, Leibnitz theorem, Taylor and Maclaurin series.

Unit 3: Integral Calculus

Standard integrals, Beta and Gamma functions, double integrals.

Important formulas sheet included at the end of the notes.
