Structural Analysis - Question Bank

College Buddy - free study resource sample file

Module 1: Analysis of Determinate Structures

Q1. Find support reactions of a simply supported beam with point loads.

Q2. Draw SFD and BMD for a cantilever with UDL.

Module 2: Deflection of Beams

Q3. Find slope and deflection at free end using the moment area method.

Q4. Solve a propped cantilever using the double integration method.

Module 3: Indeterminate Structures

Q5. Analyse a fixed beam using the slope deflection method.
